Ionicons v1 cheatsheet

It's a fork at version 1. This repository is released around the npm. The premium icon font for Ionic Framework. Designed by @benjsperry. Note: All brand icons are trademarks of their respective owners. The use of these brands does not indicate the endorsement of the brand holder by Drifty, nor vice versa. Visit ionicons.com and look at the search function, which has keywords that identify common icon names and styles. For example, if you search for arrow we invoke each icon that could potentially be used as an arrow. We also included each icon's class name for easy copy/paste when you develop! We envisage this icon package to be used with Ionic, but it is by no means limited to it. Use it wherever you see good, personally or commercially. They are free to use and licensed under MIT. At the beginning download and extract the font pack Copy the ionicons.css to your project Copy the fonts folder to your project Ensure the font urls within ionicons.css properly refer to the fonts path within your project. Include a reference to the ionons' .css includes each webpage you need to use it. Or install with component: \$component install driftyco/ionicons Or maybe you're known to use bower? \$bower install ionika HTML Sample You can use ionicons.com easily find the icon you want to use. Once you've copied the desired icon's CSS class name, simply add the icon and icon's class name, such as ion-home to an HTML element. &lt;i class=icon ion-home&gt;&lt;/i&gt; Build instructions This repo already comes with all the files built and ready to go, but can also build the fonts from the source. Requires Python, FontForge and Sass: Install FontForge, which is the program that creates the font files from the SVG files: \$brew install fontforge ttfautohint Install Sass\$gem sass Add or subtract files from the src/folder you want to be apart of the font files. Change any settings in the builder/manifest.json file. You can change the name of the font family and CSS class name prefix. Run the build command: python ./builder/generate.py Ionicons is licensed under the MIT license. Page 2 This is a fork at version 1. This repository is released around the npm.
